

RD Certificate Number: EWS807E

Spacetherm Directfix Insulation

Description

This is an assessment of Proctor Spacetherm Directfix wallboard, it is a high-performance laminate specifically designed to be installed directly onto existing solid walls.

Spacetherm Directfix is an aerogel insulation blanket bonded to a 6mm plywood board and 12.5mm plasterboard laminate. It is supplied in 2400mm x 1200mm sized boards and the boards can be supplied incorporating various thicknesses of insulation.

As the product can achieve similar thermal performance to other insulation systems, but at a fraction of the thickness with a K factor of 0.015W/mK, the solution is ideal for use in applications where low U-values are required and room space is at a premium.

Scope of Registration

Due to space limitations, the Registered Detail certificate should be consulted for the scope of this registration.

Validity

This system has been checked for compliance in accordance with English, Welsh and Scottish Building Regulations

Registration was first issued on 31/03/18 and is valid until 31/03/22 providing there are no amendments to applicable regulations.

Issue dated 21/03/2019
