

RD Certificate Number: EWS807B

Spacetherm Wallboard Insulation

Description

This is an assessment of Proctor Spacetherm Wallboard which is a high performance thermal laminate which is specifically designed to be fixed to a wall or a ceiling with timber battens or metal studs. It consists of Spacetherm Aerogel insulation blanket bonded to plasterboard. It is ideal for use in applications where low U-values are required but space is at a premium as it has a thermal conductivity of 0.015 W/mK. The insulation blanket combines a silica aerogel with a fibre matrix, the material is breathable and therefore it is also possible to directly fix the laminates to certain existing wall substrates; however, please check with A. Proctor Group Ltd.

Scope of Registration

Due to space limitations, the Registered Detail certificate should be consulted for the scope of this registration.

Validity

This system has been checked for compliance in accordance with English, Welsh and Scottish Building Regulations

Registration was first issued on 31/03/18 and is valid until 31/03/19 providing there are no amendments to applicable regulations.

Issue dated 31/03/2018
