 Address The Haugh, Blairgowrie, Perthshire PH10 7ER

Detailed Description

Acoustic Mat System to be used shall be Profloor Ecoroll supplied by The A Proctor Group, Blairgowrie. Profloor Ecoroll system is used for the reduction of impact sound and can be installed in any type of construction.

Product

Product performance specification as follows:

Thickness

3mm

Roll Size

1m x 20m

Material

Granulated recycled rubber with PU elastomer bonding agent

Accessories

Ecoroll Adhesive: 5 litre tin

Certification

Minimum required: not applicable

Technical Properties

- Impact Sound Reduction: to be no less than 20dB
- Refurb Compliance: suitable for improving the impact sound reduction between existing separating floors
- Timber or Concrete Floor: to be suitable for use in timber and concrete floors

Profloor Ecoroll is a sound-insulating material used for the reduction of impact sound. It is widely used under flooring in order to improve footfall - sound insulation. As it offers a higher level of sound insulation compared to traditional methods, it can be installed in any kind of construction (houses, offices, hospitals, trade centres, etc.).

Benefits

- Satisfies the requirements for a bonded resilient floor covering
- Ecological material – 100% recyclable
- Impact sound insulation 20 dB ΔL_w with soft covering
- Superior sound and thermal insulating properties
- Excellent vibration damper
- Very high resistance to tearing, compression and abrasion
- Easy to install, simply rolled out and bonded to the existing floor surface
- Can be tiled on using flexible adhesives and grout, (contact A. Proctor Group's technical department for more information).
- Suitable for both concrete and timber floors
- Suitable for new build and refurbishment
